# WATER IS A CRITICAL FACTOR FOR GOOD HEALTH!

Over 70% of our body is water.

Water rehydrates and replenishes our body.

ALL LIVING THINGS REQUIRE WATER TO SURVIVE!

ALL BODY FUNCTIONS DEPEND ON IT.

- It helps transport nutrients
- Metabolizes body fat
- Aids in digestion
- Maintains body temperature
- Lubricates and cushions joints
- Flushes excess toxins, regenerating your cells.

IS YOUR DRINKING WATER REALLY SAFE?

WARNING: YOUR DRINKING WATER MAY BE DANGEROUS

Chemicals, gasoline, wastes – they're all contaminating the nation's water supplies far worse than anyone expected.

U.S. News

Lead in drinking water can result in delays in physical and mental development, along with slight deficits in attention span and learning abilities in children.
